

TOOLS

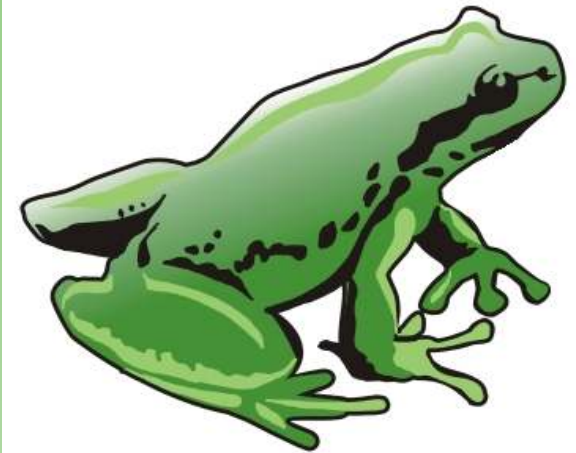

The Trust can work with landowners to preserve and restore habitat.

Tools in the Discovery Coast Greenways Land Trust conservation toolbox include...

- Consultation services
- Land Use Management Plans
- Site Surveys
- Habitat Assessment Referrals
- Conservation Covenant
- Land Purchase
- Estate Planning

Local watersheds will benefit from the protection of Greenways

Greenways Land Trust

Our Mission

To enhance the community through the creation and management of greenways networks, based on principles of stream & land stewardship and development, within public and private property partnerships.

Ongoing Projects include:

- Primary stewardship roles in Beaver Lodge Forest Lands, Baikie Island and Haig-Brown Heritage Property.
- Ongoing support for and partnerships with stream stewardship groups: providing technical advice, funding support, training, and organisational capacity development.
- Involvement in the District of Campbell River's development permit referral process.
- Providing education programs for youth and adults.
- Development of the "Greenway Loop."
- Other recreational greenway development: trail building and maintenance
- Habitat protection and enhancement projects such as invasive plant removal, re-vegetation work, inventory and mapping.

Thank-you to GLT volunteer, Enid Havelaar for creating this brochure

Our Goals

- To work with area landowners, community stewardship groups and local governments to plan and develop a Greenways Habitat Corridor System.
- To act as a community resource centre on issues of land and stream stewardship.
- To act as an agency to accept and manage environmentally sensitive land.

Beaver Lodge Forest Lands

The Discovery Coast has a remarkable variety of ecologically sensitive areas, preserved lands, seascapes, streams and river corridors. The Oyster and the Campbell Rivers provide ecological anchors to the area along with other vital streams.

As our communities grow, a healthy greenways network will ensure that this attractive setting continues to define and enhance the character of our neighbourhoods.

A Greenways Plan to preserve the greenways network, with our salmon streams as ribbons of life to tie it all together, will assure both healthy wildlife, fisheries, and human communities.

Greenways habitat networks are already here: those areas of land that are not already built up, that support habitat for salmon, for wildlife, for the plants and animals which form the ecosystem around us.

Greenways include natural preserved areas such as Elk Falls Park, and the working landscapes so important to our economy, such as the farms of North Campbell River, and the working forests in the uplands behind our ocean-front communities.

Why join the Greenways Land Trust?

- Your membership contributes to the support of our ongoing programs!
- Access to our resources: tools, equipment, stewardship library, GIS and GPS equipment, and knowledgeable staff
- Open invitation to monthly meetings and regular events.
- Receipt of monthly email updates on organisation activities, regular newsletters, and our annual report.
- Opportunity to give back to the community, support Campbell River's excellent quality of life, and protect and enhance habitat for fish and wildlife.

Thank you for your contributions!

Dedicated GLT Board of Director member,
Ron Burrell
